3 **Description of Development**

1m Lateral Reduction, 5m Crown Lift & 10% Crown Thin to 1No. Pine

In pursuance of their powers under this Act and these Regulations the Council **GRANT** consent for the operations to be carried out in accordance with the application and plan and subject to the conditions specified.

The Council certify that they are satisfied that the conditions specified are in the interests of good forestry or in the case of trees other than those comprised in woodlands, that the trees have an outstanding or special amenity value.

1 Where whole branches are to be removed and final cuts made close to a limb or branch union they are to be made as shown in Figure 2 of BS3998:2010

Where branches are to be shortened back the final cuts are to be made at the correct angle shown in BS3998:2010 and adjacent to a live bud or lateral.

Reasons: In the interests of the trees continued health and vitality and to accord with current industry guidelines and sound arboricultural practice.

INFORMATIVE: The applicant should note that under Part 1 of the Wildlife and Countryside Act 1981, with only a few exceptions, it is an offence for any person to intentionally take, damage or destroy the nest of any wild birds while the nest is in use or being built. Birds nest between March and September and therefore removal of dense bushes, ivy or trees or parts of trees etc. during this period could lead to an offence under the act.

INFORMATIVE: This notice does not give authority to destroy or damage a bat roost or disturb

a bat. Bat species are protected under Section 39 of the 1994 Conservation (Natural Habitats etc) Regulations (as amended), the 1981 Wildlife and Countryside Act (as amended) and the 2000 Countryside and Rights of Way Act. It is illegal to damage or destroy any bat roost, whether occupied or not, or disturb or harm a bat. If you are aware that bats roost in a tree(s) for which work is planned, you should take further advice from Natural England (via the Bat Conservation Trust on 0845 1300228) or an ecological consultant before you start. If bats are discovered during the work, you must stop immediately and contact Natural England before continuing.

ADVISORY:
Advisory:
·I would like to see great care exercised during the crown lifting operation over the public highway. 5metres is a reasonable extent of overhead clearance to permit long-term unobstructed access for high-sided vehicles. To achieve this, a gradual lessening of weight should be attempted so as to retain as much foliage bearing limbs/branches as possible. Final cuts should be positioned directly above the footway and in compliance with the conditions above.
