Anita,
 I am pleased to see the native planting and that the lights will have motion sensors. The plans seem to indicate that the sand catchfly (the rare plant there) will be protected through "robust ranch style open fencing". So I think those are the major issues dealt with so far as I understand the application.

Think sustainably. Do you have to print? Can you double side? Do you need colour?

Subject LU/245/10 Security fencing to boundary, security lighting to access road and construction of additional pontoon moorings Land on West bank of River Arun , Littlehampton

Don,
 Following our previous correspondence regarding the above application I have received some additional information from the agent this includes substitute landscaping proposals, drawing no. 2106/PL/01/1 and lighting details. The agent has advised that the lighting would operate by motion sensors and that the security fencing is new.

Please can you advise of any comments you may have on these amendments.

Regards

Anita
