Environmental Health makes the following comments on this application:

Please advise the applicant of the following comments from the Food Safety Officer:

The proposal for 'added' seating to existing restaurant is noted, but no proposal for increased food preparation facilities or cooking capacity in proportion to higher customer no's. New 'store' situated are rear of new toilets, in extension, is accessed through toilet lobby, which is not acceptable if used as a food storeroom.

Increased cooking for additional customers, could result in increased odour/noise emissions, has applicant any proposals for ventilation upgrade or additional control measures. I cannot support this application as these proposals are a missed opportunity to increase the capacity of the current limited food production and food storage areas for both premises, which could be achieved by a layout change and direct attachment to the current kitchen at No.24.

Please also note the separate comments from Rob Findlay
