- ✓ **National deal with Home Builders Federation (HBF)** – competitive rebates for members**
- ✓ **Professionally delivered** – live when homeowners move in
- ✓ **Open access networks** – choice of service providers and packages for consumers

From the industry's partner of choice

GTC is the leading independent utility infrastructure provider with over one million UK homes connected to our gas, electricity, water or fibre networks. We bridge the gap between you and the incumbent, taking away the headaches and providing a simple, single-supplier solution for all your utility requirements.

UltraStream300 from GTC is pure Fibre-to-the-Home (FTTH) technology. Delivering unlimited speeds on networks with infinite capacity built-in, it will delight homeowners today and still meet their needs tomorrow.

GTC fibre networks support a Fibre Integrated Reception System (FIRS) option for access to a wide range of satellite and free to air TV services including 3D, HD, Sky Q and On-Demand viewing as well as digital radio.

In Partnership with Sky TV, GTC delivers UltraStream300 – enabling access to ultrafast broadband, calls and great entertainment including Free Sky TV for 12 months.

*Actual speeds will depend on the service package selected.

**Subject to individual assessment for feasibility. Terms and conditions apply.

Subject to status. Upfront payment may be required. 12 months Free Sky TV offer: Original Bundle free for 12 months (usually £20 pm) for customers who reside in a property served by seethelight. 12 months minimum term and further terms apply. Check the seethelight website at www.seethelight.co.uk for more details. **Free Sky+HD Box Offer:** Excludes existing Sky+HD box households. One free box per household. Set up fees may apply. **On Demand:** Available to Sky TV customers with compatible Sky+ box. Downloading content requires compatible black Sky+ box, broadband connection (minimum recommended speed 2 Mbps), On Demand self set-up using built-in WiFi or own cable or On Demand connector (£2195 – limits apply). Sky+ subscribers without Sky TV can access BBC iPlayer, ITV Player and All 4 only. **Sky+HD:** The HD channels you get depends on your Sky TV/HD package. BBC HD Channels, ITV1 HD (England and Wales only) and Channel 4 HD are available without subscription. Channel 4 HD requires a viewing card. **General:** Further terms apply. Correct at 17 March 2015.

We have a range of Independent Service Providers and packages to suit every homebuyer, whatever their online lifestyle.

UltraStream300 300Mbps

Delivered via GTC's end-to-end FTTH technology – for not a penny more!

**UltraStream300
from GTC**
gives instant
access to an
online life in the
fast lane.

**Ultrafast
over 100Mbps**
Delivered by Fibre-To-The-Home (FTTH) or cable

**Superfast
over 24Mbps**
Delivered via copper connection or Fibre-to-the-Cabinet (FTTC)

Why choose FTTH?

Copper is outdated and unreliable with speeds that decline over distance. Typically, copper delivers less than half advertised 'up to' speeds. Even Fibre-to-the-Cabinet (FTTC) relies on copper for the last leg of delivery from the cabinet to the home.

FTTH is the only option that delivers end-to-end fibre, and is fast becoming the only choice for today's discerning homebuyer.

"68.8% of respondents would be put off from buying a 'beautiful new house' if it lacked fast broadband. 73.9% considered that broadband was 'critically important' to their home life." Survey by ispreview.co.uk

"The more demanding buyers now want fibre-optic superfast speeds as, whether working from home, streaming entertainment or managing the stack of equipment that now relies on this, a property needs to have 21st-century connectivity."

Henry Pryor, Property Expert

"Over time we expect ultrafast technologies to evolve towards providing gigabit speeds and above – 1000Mbps or more."

Making Connections' Report
