

25/10/17 DELIVERED BY HAND

Re: Planning Application LU/267/17/PL - Chilgrove House

I wish to have my concerns in respect of the above application, taken into consideration as follows:- NOISE

- ① The Community Rooms have shared walls with my flat, in particular my bedroom on 2 sides & my inner hall & toilet. There is already a CRACK in my inner hall which appeared since the cladding was installed approx 4 yrs ago.
- ② Since I have severe health concerns e.g. M.E., Fibromyalgia, C.P.S., Atrial Fibrillation, depression which seriously affects my sleep pattern & my health in general. Most of the time I am still awake at 5am, therefore need to sleep late to catch up. I can obtain a letter from my G.P. if required to support this. With the building work starting at 8-8.30 this causes me serious sleep deprivation.
- ③ The building itself has a design fault which means each tenant can hear snoring from neighbour (e.g. 2 floors up!) toilet habits, telephone conversations, loud footfalls etc. In other words everyday normal living activities can be heard from total strangers which, in normal dwellings cannot be heard. Like having strangers in your bedrooms & bathroom if you live a house!

Continued...

Therefore we request that :-

a. Sound proofing be carried out on the shared walls between my flat & the community rooms BEFORE the conversation works begin.

b. Consideration to the start time each day be given please. Enough noise & dust has been suffered by us in Chilgrove over the past years e.g. renovations & worst of all the nightmare of the cladding installation!

c. As a final note! - the parking facilities outside 6-11 Chilgrove are extremely limited. I cannot walk very far with shopping & need to know that on my return I will be able park in my space!

I am willing to co-operate as much as possible but my health comes first & consideration & co-operation works both ways.

Thank you your time & consideration

Yours faithfully,
Georgina Monero
