

25th October 2017. Planning Application LU/267/17/PL Chilgrove House.

I live at No 12 Chilgrove House which is immediately above & bridges the Community Centre where the work is planned to take place.

The proposed building work will directly affect me in the following way.

- 1/ My health will suffer since I have - depression, ADHD & other mental health issues.

The building work will be a great disturbance to me with the extreme noise while work is in progress. I am also concerned about the additional noise from the new tenants below as ordinary everyday life noises can be heard from other flats which we shouldn't have to hear.

2/

It would be grate if sound proofing to the ceiling & walls be done before the building work starts, that way dulling the noise impact of the work. I am seriously worried about this.

Thank you for your attention
