Subject: RE: LU/274/21/DOC - Croft Cottages, Littlehampton, BN17 5LS - UPDATED CONTAMINATION COMMENTS REQUIRED

Hi Kate

Just forwarded you the emails x 2 from Martin Critchley at CAAD dated 11th Oct which assume has appendices on?

Noted re EA consultation requirement and also parts 3 and 4 – so looks like a refusal of that condition for contamination anyway

Thanks

Amy

Hi Amy,

Please may you forward the appendices as I think they've fallen off the e-mail chain, thank you. I will review the appendices and confirm tomorrow whether parts 1 and 2 of the condition have been met.

It is recommended that the Environment Agency is consulted with regard to the provision of soakaways in relation to the condition of the land.

The Contamination Mitigation Report does not constitute a satisfactory optional appraisal or remediation strategy, therefore parts 3 and 4 of the condition cannot be recommended for discharge. It will not be possible to recommend discharge of the entire condition until a separate Verification Report is provided on completion of groundworks on site (to include soft landscaping).

Thank you,

Kate.

Subject: FW: LU/274/21/DOC - Croft Cottages, Littlehampton, BN17 5LS - UPDATED CONTAMINATION COMMENTS REQUIRED

Hi Kate

I need to decide this by this Thursday. Please can you get comments to me by COB tomorrow so I know if we can approve this part of the DOC?

Thanks
Amy

Hi Martin,

Thanks for your emails. Again, I am copying in Kate our Land Contamination Officer at Arun (as the email address you had put was incorrect).

Kate – please can you provide updated comments on the updated Contamination info (sent by 2 separate emails, below and before) by Monday 25th October?

If all is then acceptable, I can then issue the decision on the DOC ready for due date 2nd Nov.

Thanks
Amy

Good Morning Ladies.

Replying jointly with regards to the above, will I trust be helpful.

#1
Please find attached the Appendices to the 'YEX.1975' report. I am sorry these were omitted earlier.

#2
The intention of the Aquacell crates is that they will act as soakaways. Our starting premise is that the contaminated soil is to be removed, and with a working tolerance to the excavated depth, the source of contamination will be removed. Given the constricted nature of the site and the fall to the rear of the site, we consider the crates proposal to be the 'least worst' option. Southern Water Catch Pit 7851 to the north west is a negative fall from the site, and the storm sewer in Clifton Road is 60m to the east across private land. We also note that currently there is no formal storm drainage or water management on the site, with potentially contaminated run off passing, unrestricted, under the rear fence to the adjoining yard. Southern Water map extract attached.

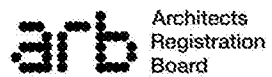

#3
Condition 9 .3 and .4.
There is a paradox logic in the discharge of the overall condition, which requires approval to a scheme of risk management BEFORE work commences. The site investigation works required by .3 and .4 constitute a commencement of works. We assume this can be resolved with a partial discharge of the Condition, with a caveat as to the test results.

If you require any further information we will be pleased to respond.

Regards,

Martin (Critchley)
