Arboricultural Report
For

2 Selbourne Place
Selbourne Rd
Littlehampton
West Sussex
BN17 5NH

Report Number : TR/05/10/11/Selbourne

October 2011

Introduction

We have conducted an inspection and have compiled a tree report for: -

1 X Poplar in the garden of Selbourne Place, Selbourne Rd, Littlehampton

Tree Description

1 X Large multi stemmed Poplar tree in the rear garden.

Tree condition

The main trunk of the tree is split into about five stems at ground level. There are signs that the main bowl of the tree is rotting creating a weakness that could allow one or more of the stems to fail.

Recommendations

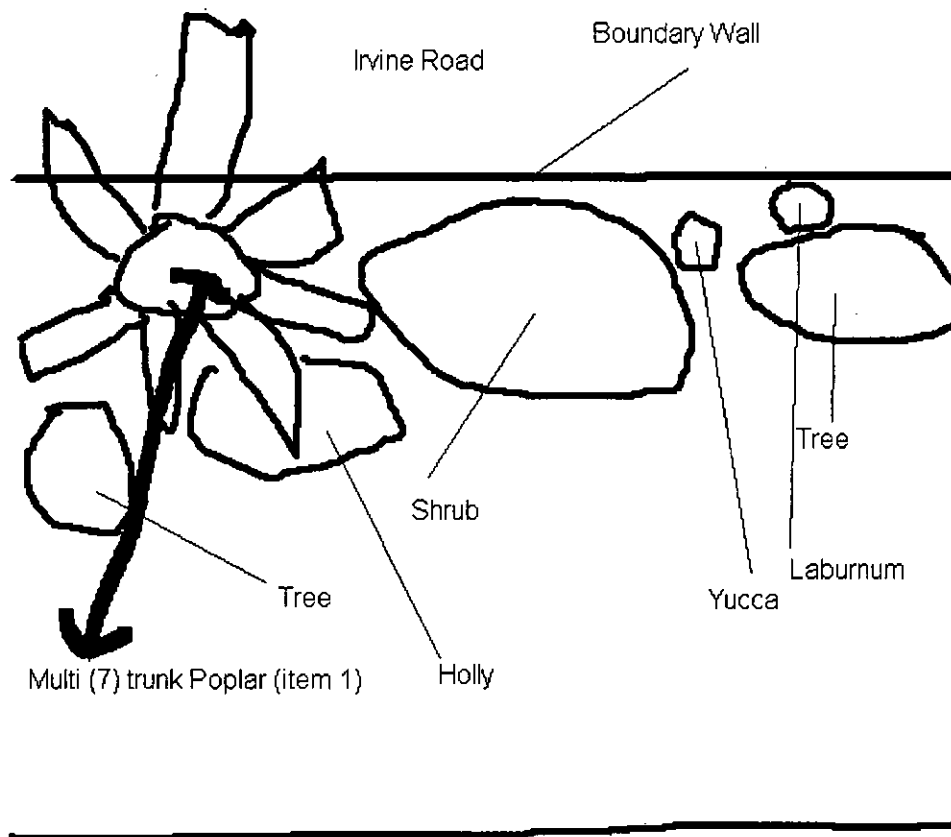

That the tree is felled to ground level and allowed to re-grow as a coppice. The condition of the tree is such that I feel there is no practical way of making it safe by any other means. The weight in the canopy is such that the trunks are under enough pressure to fail under their own weight.

Arboricultural Excellence can take no liability for any future damage that the trees in this report may cause. We can only provide our professional opinion and recommendations.

I hope this meets with your approval and await your further instruction. If you have any further queries then please don't hesitate to call me.

Yours sincerely,

Rowan Mellor
