Dear Anita

Please find attached visuals of the proposed building as promised. These are shown from all four sides and give a much better representation of the form of the building. They are low resolution versions to keep the file size down on your system, if you need them bigger please let me know.

I have seen the immediate neighbour has commented on the application about the windows to the northern boundary. In response to his comments no windows are actually located along the direct boundary, unlike the previously consented scheme or in fact the existing building. The proposed windows are actually set back at an angle from the boundary and face more NNE.

If you have any questions at this stage please do not hesitate to call.

Regards

Simon
