

**Geo-Environmental
Ordinance Survey Plan
Published 1970**

Source map scale - 1:2,500

The historical maps shown were reproduced from maps predominantly held at the Ordnance Survey archives. The maps were adopted for England, Wales and Scotland in the 1840s. In 1854 the 1:2,500 scale maps were published for the first time. The maps were published in the 1970s and the whole of what was considered to be the unincorporated parts of Great Britain. The published data given below is often some years later than the surveyed date. Before 1939 all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas.

Geo-Environmental Supply of Unpublished Survey Information

Published 1973 - 1974

Source map scale - 1:1,250

SUSI maps (Supply of Unpublished Survey Information) were produced between 1972 and 1977, mainly for internal use at Ordnance Survey. These were more of a 'check-progress' plan as they showed updates of individual areas in a map. These maps were unpublished, and the sheets represent a single moment in time. They were produced at both 1:2,500 and 1:1,250 scales.

Geo-Environmental Additional SIMs

Published 1990 - 1991

Source map scale - 1:1,250

The SIM cards (Ordnance Survey's 'Survey of Information on Microfilm') are further additions of mapping which were produced and published in 1990. They contain information on the area covered by the SIMs from 1947 to 1994, and include detailed information on buildings, roads and land use. These maps were produced at both 1:2,500 and 1:1,250 scales.

**Geo-Environmental
Large-Scale National Grid Data
Published 1995
Source map scale - 1:1,250**

Large Scale National Grid Data superseded SMI cards (Ordnance Survey's Survey Information on Microfilm) in 1992, and continued to be produced until 1999. These maps were the first maps of Great Britain and Ireland to provide detailed information on the land use and land cover of the country. Topographic features such as vegetation. These maps were produced at both 1:2,500 and 1:1,250 scales.

Geo-Environmental Sussex

Published 1879

Source map scale - 1:10,560

The historical maps shown were reproduced from maps predominantly held at the time adopted for England, Wales and Scotland in the 1840's. In 1854 the Ordnance Survey (OS) was established. This body produced maps at a scale of 1:10,560. These maps were then used to update the 1:10,560 maps. The published data, therefore, are often some years later than the surveyed date. Before 1938, all OS maps were based on the Cassini Projection with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in cutting areas. In the late 1940's, a Provisional Edition was produced, which updated the 1:10,560 mapping from a number of sources. The maps appear 'unfinished', with all military camps and other strategic sites removed. These maps were initially overprinted with the National Grid. In 1970, the first 1:10,000 maps were produced using the Transverse Mercator Projection. The revision process continued until recently, with new editions appearing every 10 years or so for urban areas.

Geo-Environmental Historical Aerial Photography Published 1947

Source map scale - 1:10,560

The Historical Aerial Photos were produced by the Ordnance Survey at a scale of 1:1250 and 1:10,560 from Air Force photography. They were produced in 1944 and 1945 as an interim measure, pending the production of conventional maps. The photos were taken at a height of 10,000 feet and were taken in black and white. The photos were checked for potentially unsafe information with security sites released by the fields or clouds. The original editions were withdrawn and only later made available after a period of fifty years although due to the accuracy of the editing, without viewing both revisions it is not easy to spot the edits. Where available Landmark have included both revisions.

Geo-Environmental Ordinance Survey Plan Published 1977

Source map scale - 1:10,000

The historical maps shown were reproduced from maps predominantly held at the Ordnance Survey, which were adopted for England, Wales and Scotland in the 1840's. In 1854 the 2,500 maps of the Ordnance Survey were published. These maps were then used to update the 1:10,000 maps. The published data, however, is often some years later than the surveyed date. Before 1938, all OS maps were based on the Cassini Projection with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in collating areas. In the late 1940's, a Provisional Edition was produced, which updated the 1:10,000 mapping from a number of sources. The maps appear 'unfinished', with all military camps and other strategic sites removed. These maps were initially overprinted with the National Grid. In 1970, the first 1:10,000 maps were produced using the Transverse Mercator Projection. The revision process continued until recently, with new editions appearing every 10 years or so for urban areas.

Map Name(s) and Date(s)

Historical Map - Slice A

Order Details

Order Number: 145702729_1_1
Customer Ref: GE16903
National Grid Reference: 503370, 103260
Slice: A
Site Area (Ha): 2.71
Search Buffer (m): 1000

Site Details

Daisyfields Touring Park, Cornfield Close, Wick,
LITTLEHAMPTON, BN17 6LD
