FENSA
Registered Company

Registered in Cardiff No. 2130541

Aluminium provides not only greater strength but is also more resistant to the elements and therefore unlikely to warp or rot. We provide a complete range of window systems to suit the needs of any project, commercial or residential, providing the flexibility, style and performance that designers are looking for when specifying glazing solutions. Manufactured to the highest standards using aluminium our windows are inherently strong, lightweight and sustainable.

We are a FENSA registered member (16737) employing our own dedicated fitting teams, which means as soon as your new frame installation/s have been completed and payment received we will send you our 10-year guarantee which is also insurance backed by the Glass and Glazing Federation. We will register your installation with FENSA, who will then send you your certificate of compliance.

Installation should take approximately 1 day and this will include all making good and the disposal of debris. I hope the above will be acceptable to you and should you wish to proceed with your quotation we would require a 20% deposit leaving the balance payable on completion.

Why choose us?

- Family run company established since 1987
- Professional service and friendly advice given
- Competitive prices without compromising on quality
- Currently undertake works for Sussex Police, Local Authorities, Schools and Colleges
