Quotation for Replacement Windows

Thank you for asking Horsham Glass & Glazing to provide you with this quotation. I've included for you to view a comprehensive quotation. If some of the abbreviations or terminology used in this quotation confuses you don't worry, further consultation will highlight these areas and become much clearer at a later date. My main aim is for you to understand the fundamentals for now and any personal recommendation I might have.

- I have priced you for our PVC-u system Profile 22. Profile 22 have designed and patented their own unique reinforcing which is called 'R.C.M' (Fibre Composite Materials) this also has the added benefit of increasing the 'U' value to an unprecedented 'A' which is the best obtainable energy rating for our industry.
- We have under no circumstances ever experienced discolouration due to ageing or contamination from any type of pollution with this product.
- I have chosen to use our own handles – locks - hinges, and extra security features. Price was not an option when choosing longevity - appearance – specification - construction
- All items are independently priced and are accompanied with a design of the window/door.
- I have incorporated in the price for energy rated products which are endorsed to the customer after completion of installation.
- All diagrams shown are viewed from the outside of the property. Openers are identified by green lines which come to a point. This indicates the hinge side.

Hinged Side

Plastics Window Federation

PROFILE 22

The FS70 and the FB70, both similar in price but totally different in appearance. An estimated 22,000 Profile 22 windows, doors and conservatories are fitted each week, that's over one installation every 30 seconds! Colourfastness test carried out in the Arizona desert and at Profile's 22 Telford headquarters simulate long term exposure to weather and airborne pollutants. With more than 30 years experience Profile 22 is among the top three suppliers of PVC-u frame materials in the U.K. The people behind the Profile 22 system were the first to introduce PVC-u into the U.K in 1976. With this product being a four chambered profile rather than the standard three chambered profile and having a special R.C.M reinforcement we are able to achieve the 'A' energy rating if essential to your requirements.

	Total Cost Including VAT and Fitting	*Extra price for Energy Rated windows if Required	Energy Ratings Available
• Profile 22 system FS70 or FB70	£ 2034.34	Included in Price	'C' Rated
• State of the art security. BS7950 kite mark		£ 140.76	'B' Rated
• Energy rated windows and glass		£ 172.95	'A' Rated
• Unique reinforcing eliminating the need of steel			
• Specially designed hinge incorporating both easy clean glass function & fire escape to all 1 st floor windows			
• 70mm frame depth, 4 multi-chambered.			
• 'A' 'B' or 'C' Energy rating if required			

All windows and doors are fitted with the appropriate glazing (document N safety in relation to impact, opening and cleaning) and meet all other required standards.

- A: Structure.
- B: Fire and safety.
- F: Ventilation.
- L1: Conservation of fuel and power.

Personal Recommendation:

I have allowed for a few extras which I personally feel is essential and will result in a sooner rather than later return on your investment; however, it might be you feel it unnecessary and don't require these extras and would be satisfied with standard requirements of our industry. This would undoubtedly mean a difference to the overall price in your favour. Please contact me if this is the case.

- Energy saving glass
- Energy rated windows
- Our own high security features and ergonomically designed handle
- Edge trims reducing the need to redecorate around the window/door by up to 98%
- Additional expanding foam around window/door improving insulation to cavity walls

***Energy Rated or Energy Efficient?**

Some products cannot, as yet, be given an official BFRC energy rating. You can still, however, buy matching sealed units for your doors, sidelights, tilt and turn windows, patio doors and other non-rated products. This will save you money on running costs when compared to older-style units.

If you wish to proceed with this quotation, please contact the showroom quoting your name and reference details shown under the date. Our surveyor, Dan Wakeham, will then make contact with you in order to arrange a time and day to take precise measurements for the manufacturing of your new windows/doors.

Once a full survey has been carried out and agreed to your satisfaction, we would ask that a deposit for 25% of the total amount be made payable to Horsham Glass & Glazing. The final 75% will be required on completion.

Although we sell the latest in security features if you require additional security or any other feature that you have seen then please contact me by either email or phone

An insurance backed guarantee from the Plastics Window Federation and the Fensa certificate will be issued upon final payment.

If you wish to discuss this quotation further regarding price or any other queries then please contact me on 01403 259054 or send an email direct to me simon@horshamglass.co.uk

Yours sincerely

S.Crisp
Director
