To whom it may concern,

It has been brought to my attention that there are 2 planning application forms at either end of Oldmead Rd. regarding a Solar farm.

By talking to other residents on the estate none of us knew about this.

The road that the lorries would have to go down to get to the field that these Solar panels are planned to go in is an 'unadopted Rd' and is in a very very poor state, by allowing these vehicles to travel down this road would bring more chaos to the road.

There is nothing stating that the road would be repaired afterwards and nobody has approached us to ask how we feel,

I have also heard that the field was an old landfill site - which gives me great concern as I have young children.

Why) were we not consulted on this
issue at all - or offered any sort of
meeting .

Yours Sincerely
