Re: Planning application for Solar Pannels on
Brook Barn Farm: LU/385/14/PL

To whom it may concern

I wish to lodge my objection to the plans to put a Solar farm on the field at the bottom of Old Mead RD Wick.

The reason being access via my rd. (Old Mead) is unsuitable due to condition of the road and the noise, dirt and disruption it will cause.

I have been told that the site was a rubbish site then filled in and became a land fill site, so does anyone know what is in it? Is there canisters in it? and is there dangerous gases accumulating/accumulated (methane)

Our houses are classed as being on a flood plane area so the field would be also.

CHILDREN will not be safe, they wouldn't be able to ride their bikes or scooters or even play out.

We have bats and owls in our area, this will cause major disruption for them. Plus our own domestic animals will not be safe in the road due to the trucks hurtling down the road.

- My housing Association has been informed now about the Solar farm. So await their response to the plans

I am very worried about the decibells coming off the Solar panels and the noise of the Junction Box at the side of my house, all of the noise of the above will make my life a misery. I have MENTAL HEALTH PROBLEMS already. I don't know ^{how} all the extra stress will impact on my existing health problems.

- The time given on the notice of Planning was only 30 days to lodge our objections is/was a very short period and not enough notices was displayed in the areas that would be effected by the Solar Farm.

It all seems very unfair the way this Plan/site application has been done, with no consideration of the residents of this road or surrounding areas.
