Extension

It is not clear how the change in the proportion of the population aged 65 and over is related to the change in the proportion of the population aged 15 and under. The proportion of the population aged 15 and under has increased from 1990 to 2000, while the proportion of the population aged 65 and over has decreased. This is due to the fact that the population aged 15 and under has increased more rapidly than the population aged 65 and over.
