

[REDACTED]

Can this go on the DIP button only.

Thanks

Mark

I will shoulder the blame for this as I acted on what Lynnyrd had said when I last spoke to him that we had no comments back from you. I will ask for this email to go on the file to correct that so there can be no question that we did have your comments. Your original comments will also be uploaded.

I really am not happy that this has happened with all the trouble you went to to attend to this. Unfortunately once a decision is made it cannot be rescinded. I can only sincerely apologise.

Seriously Juan?

The decision notice gets issued today, 11 days after the 6week timescale expires, which coincidentally is the same day I forward the TPO information (TEMPO form and GIS plan) – which your team were anticipating.

I then check the Officers Report online and it states;

CONCLUSIONS

No comments have been received from the Tree Officer and there are no objections to the works proposed

My detailed consultation response was forwarded to your team on March 25th.

If planning officers are going to act against my advice then that is absolutely their prerogative and I accept that, but I expect the planning department to always be professional when publicly stating my position especially when my advice is so clearly contrary to the decision taken and with significant consequences arising for those trees affected.

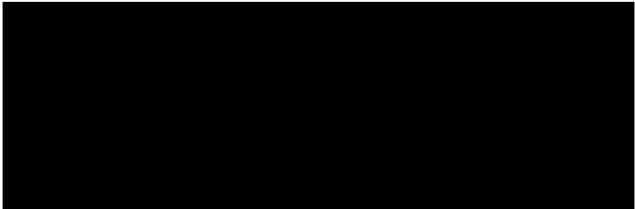

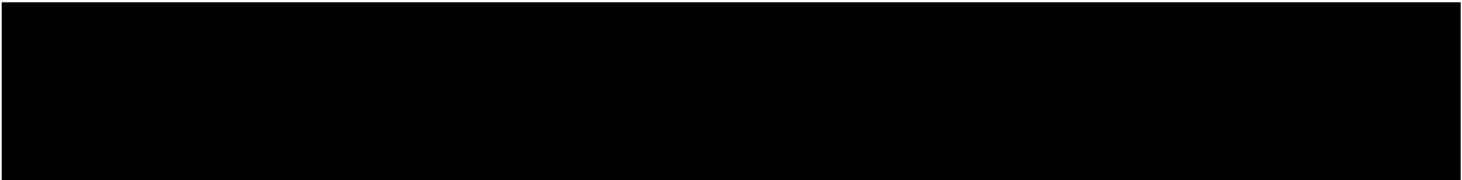

I urge you to reconsider and hopefully reverse the decision.

At the very least you should amend the officers report and ensure that my consultation response is online.

How difficult is it to get a Notice printed off and out on site? It is essential that we still make TPOs. Other districts and boroughs are continuing to do that and several Tree Officers in the County have already reported a spike in unauthorised works, no doubt due to the Covid-19 restrictions. It is so important we continue to show a presence as the pressure will only increase the longer those restrictions endure.

Regards,

Mark

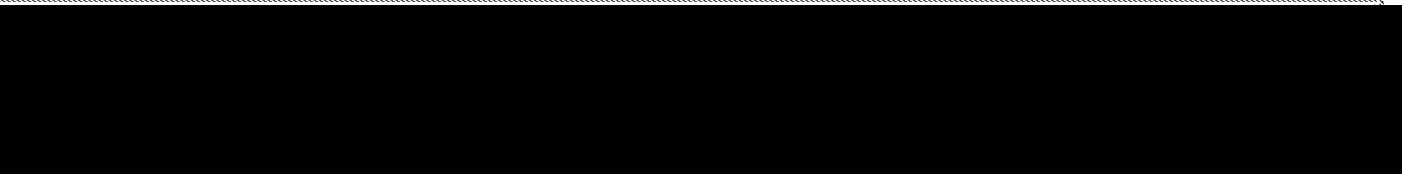

Hi Mark

I am really sorry but this was issued before I had the benefit of reading this email. We needed to get decision out as the date by when to make a decision had expired.

I hope you and family are well.

Hi Juan and Lynnyrd

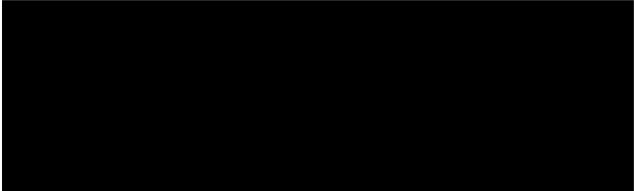

Apologies for the late follow-up.

Please note there is a **TPO recommendation** associated with this Sect.211 Notice. By my reckoning the **6week timescale expired on April 6th - so we need to get a TPO Notice on site as soon as possible** (under the circumstances). These are significant trees and will be effectively destroyed if the applicant enacts their work proposal.

TEMPO form and GIS plan attached.

Thanks,

Mark

Hi Lynnyrd

Please find attached my report for your consideration.

I had hoped to prepare the GIS (TPO) plan but the online mapping is unavailable to me at this time.

Plan and TEMPO form to follow then, in due course.

Hope you and yours are well.

Regards,

Mark
