Dear Sir or Madam,

I am writing with concern's at the proposed new building at the waitrose site, planning Application no LU/3/19/PL, I have seen picture's and I do think it looks nice and is certainly better than what's there now, my concern is parking, will it make my street even worse than it already is as it seems that there will not be adequate

p10

parking for these new build's, at the moment Queen street, Connaught road, York Road are solidly parked up 24/7, with people parking here all day who are working in the town, even leaving there car here to catch train's to work, also River beach school has inadequate parking and the overflow is in our streets, I mostly park in Connaught or York Road, which is not fair on them, I really wish the council would take this problem up, meeting's I have addended in the past have come to nothing. Since you have opened waitrose car park up again recently, you can really notice the difference as people who park here, are now going
etc

in there and parents also are
able to use it for dropping off
there children for school, please
consider this, and any way
you could help us with this
parking nightmare we have
here.

Many Thanks
