Comment from Greenspace,

As this is a proposal for development of residential flats and retail floorspace there would be no requirement for POS or play area contribution. However greening to soften the development would be required on a development of any kind. There is a real opportunity to increase and improve the greening of this site with the inclusion of a careful selection of trees and shrubs both benefitting the aesthetics and biodiversity of the site.

Forming part of the application and at least conditioned would be the requirement of the submission of a full landscape scheme which should be submitted for approval, detailing species choice, position, densities and size at time of planting. This should be plotted in plan and list form and in relation to the trees and vegetation to be retained in the locale, so that a clear picture of the proposals can be seen. These details are required to assure the proposals are appropriate to its setting and to ensure that appropriate screening is provided, maintaining and uncompromising the setting and ensuring that the proposals fit within the area of neighbouring and adjacent properties.

We note a requirement for any scheme, in accordance with policy to be of High Quality Design, the nature and usage of this development should not compromise this requirement.

Any trees worthy of retention have the potential to provide established screening and should be protected from construction damage. Root protection Areas (RPA) should extend into the development site and to those in neighbouring land. Before construction, a tree protection scheme must be in place for any adjacent trees whose root protection areas fall within the construction zone from neighbouring land. This should be in accordance with BS 5837:2012 'Trees in relation to construction'

I would recommend no Landscape objection subject to the submission and approval of the information above.
