Subject: Planning application LU/71/17/PL 56/57 Pier Road, Littlehampton

Dear Sir/Madam, Once again we would like to object to the above planning application. These terraced buildings, previously fishermen's cottages and built in the 1800s, have already taken a real pummelling when the walkway was built with the piling that had to be undertaken, and the walls were really shaken with pictures falling off them with the vibrations at that time. There are no usual foundations with these buildings and we think this should all be taken into consideration when granting permission for 6 extra flats to be incorporated in the adjoining building.

Also the question of parking should be thought about. In the Summer Months, from May to September, there are double yellow lines all around this area and as it is now, the staff that work at the Retail and A3 premises in Pier Road already find it very hard to find anywhere to park in the area. With another 6 flats let out it will only become worse, especially as the plans incorporate building in the back yard, which is the current parking area for 56 and 57 Pier Road.

Please take our comments into consideration when considering this planning permission.

Many thanks. Mr. F. And Mrs. K. Steines, 55 Pier Road, flat above Fred's Fish and Chips, BN17 5LP
