Dear Lloyd Willson

Public Toilets, North Street, Wick, Littlehampton, West Sussex, BN17 6JL.

I'm pleased to let you know that we've visually checked your property, and found no live gas pipes or equipment that we own.

Please remember that our gas network does run under the area shown on the enclosed drawing, so make sure you take extra care if you're planning any further development of the area. If you're working with a third party, please give them an exact copy of this drawing if they need it.

If you are planning any further development on your property, including work that may cross our gas mains with heavy equipment, or siting of temporary accommodation or storage compounds, then you'll need to let our plant protection team know before you begin. Please call them on 0845 070 3497 so they can help you with any safety measures you'll need to put in place to avoid damaging our network as you will be responsible for any repair costs.

Please be aware you must comply with the safe digging practices outlined in the HSE (Health and Safety Executive) publication "**Guidance Note HSG47 – Avoiding Danger from Underground Services**". This can be found at: www.hse.gov.uk/pubns/books/hsg47.htm

If you uncover a pipe of any condition which you think may contain gas, it must always be treated as live and dangerous so call our Customer Service team on [REDACTED] immediately and we'll come and do a safety check.

Yours sincerely

Darren Robertson
