Hi Anita

I have liaised with the licensing team with regard to this application and have the following comments to make:

EH and Licensing note the points made within the residual risk rating document submitted with the application but we still have concerns about this application due to the following issues:

1. The applicant states that the pavement will be used between 08.00 and 23.00 hours. However, using the outside area may give rise to additional noise from customers either sitting at the tables or others gathering around this area. There are residential flats directly above and opposite this location and there is the potential for noise from customers to become a nuisance.
2. The applicant states that toughened glassware will be used. However we have concerns about how the business will enforce this as door staff are not provided for the majority of the trading hours. It will therefore be difficult to monitor and control who goes outside and prevent people taking glasses outside.
3. There is already litter in the form of cigarette ends outside the premises and it is likely that with people gathering and drinking outside littering could increase. In addition, if plastic drinking vessels are used empty vessels not collected immediately could be blown off tables and add to littering in this area.
4. The addition of seats in this area could inhibit access along the pavement as the area is already commonly used to park mobility scooters and there are also bikes attached to the lamp post opposite the door.

The applicant has not sufficiently addressed these issues and therefore we would recommend that the application is refused.

Regards

Anna Appleton

Hi Anna,

The above application is on DC Committee on 11-07-2018.

I have just consulted environmental health because Members have requested that licensing provide a comment.

Please can you let me have comments as soon as possible, by 09-07-2018 would be appreciated so that I can include the response in the Committee Report Update

Many Thanks

Anita
