Hello Silvie

I have checked the spec and can confirm that the glazing bars are integral

The existing windows have frame depths which are in the order of 60mm so we shall will be using frame depth of 62mm with sash depth of 63mm which will match all the existing detail.

Hope that helps

Kind Regards

Brian

Dear Mr Elstone,

I am the case officer for the above application and have been reviewing the submitted information.

The submitted windows brochure mentioned that 28mm glazing is supplied as a standard with various choices of frame depths, however the plans do not specify the proposed thickness.

Please could you confirm the proposed thickness of the windows profile and whether the glazing bars would be integral or applied?

Many thanks,
Silvie Steiningerova
