

Statement of intended work 70 High Street, Littlehampton

The building has recently been vacated by HSBC and was used as a bank with attached office space to the ground, first and second floor level. The existing retail unit is to be retained and permission has previously been granted to convert the first and second floor office space into 2 no. flats. This application is to convert the remaining office area to the rear of the property into a ground floor and a first floor flat. The proposed works are shown on the application drawings and it is further proposed to provide a new window in an existing door opening and to provide a new door opening within an existing window opening both fronting on to the side pavement.
