Subject: RE: Planning Consultation on LU/7/18/DOC

It is noted that the percolation testing/groundwater observations have been carried out in May/June ie. outside the required winter period.

The percolation rate is detailed as 'negligible' however, a rate (m/s) has not specified.

Before the proposals can be considered further, please provide more information on the percolation rate achieved. This will determine if further testing, etc is required. We need to be satisfied that infiltration has been fully investigated before other options are considered.

Regards

Paul Cann
