Dear Michael,

Apologies. The current DOC appeared only to relate to those matters detailed. Nevertheless, I am able to amend my comments as below.

Environmental Health:

Condition 22 - Construction Management Plan. CEMP Version 4. I note that this document removes the previous reference to mechanical piling provided in Version 3 and presume that this is because no such operation will be necessary on this site.

Condition 23 - Construction Compound. I note that a buffer zone will be provided to Parcel B6, which is defined in Appendix C of the CEMP relating to the southern section of the Lyminster By-Pass. This is in order to protect the amenity of sensitive receptors already built to the east of this site.

Agree discharge of Conditions 22 and 23

I refer to the 8th Issue of that Noise Assessment provided by WYG, dated 14th February 2020, the recommendations of which will be applied in full.

Condition 37 - Noise Mitigation. Agree to discharge of Condition

Condition 38 - Private Amenity Spaces. Agree to discharge of Condition

[REDACTED]

Please note my Work Days are Tuesday to Friday

[REDACTED]

Dear Carol,

What about **Condition 38**?

Kind regards,

Michael
