Please identify the tree(s) and provide a full and clear specification of the works you want to carry out. Continue on a separate sheet if necessary. You might find it useful to contact an arborist (tree surgeon) for help with defining appropriate work. Where trees are protected by a TPO, please number them as shown in the First Schedule to the TPO where this is available. Use the same numbers on your sketch plan (see guidance notes).

Please provide the following information below : tree species (and the number used on the sketch plan) and description of works. Where trees are protected by a TPO you must also provide reasons for the work and, where trees are being felled, please give your proposals for planting replacement trees (including quantity, species, position and size) or reasons for not wanting to replant.

E.g. Oak (T3) - fell because of excessive shading and low amenity value. Replant with 1 standard ash in the same place.

T1/470 Holm oak along the southern boundary wall:

o Shorten the split limb heading south east by 3m to alleviate the loading on the split

- Current Branch Length 9.0m
- Finished Branch Length 6.0m

o Reduce the remaining apical and lateral spread by a maximum of 3m

- o Current height 12m
- o Finished height 10m
