Subject: RE: M/106/17/T - 72 Silver Birch Drive, Middleton-on-Sea

Dear Zac,

I am happy for the proposed crown thinning to be removed from the application.
This will leave the 2m reduction on the eastern side, and the removal of the epicormic growth and the dead wood.

Regards
Steve Smith

Dear Mr Smith,

This email is regarding you current application for tree consent works at the rear of 72 Silver Birch Drive, Middleton-on-Sea.

As it stands, the application is set to be refused, as the Arboriculturalist believes that the crown thinning will not achieve any benefit, as the increase in light to the tree will promote growth within the crown, resulting in a denser canopy.

If you would like, I can remove the crown thinning from the application. This would allow you to perform the 2m reduction to the Eastern side, and the removal of epicormic growth.

Please reply within 2 weeks so I can change this for you.

Many thanks,

Z Denton
