Dear Sir/Madam

AMENDED PLANS - ERECTION OF A NEW 4 BEDROOM DWELLING

66 ANCTON WAY ELMER MIDDLETON-ON-SEA PO22 6JP

Thank you for the amended plans for the above application, please wuote our reference on all correspondence.

Environment Agency position

The proposed development will only meet the National Planning Policy Framework's requirements if the following planning condition is included.

The development shall be carried out in accordance with the submitted flood risk assessment (ref UK Flood Risk Consultants: Flood Risk Assessment- 66 Ancton Way, Bognor Regis PO22 6JP) and the following mitigation measures and plans it details:

- all sleeping accommodation will be located on the first floor and above

These mitigation measures shall be fully implemented prior to occupation and subsequently in accordance with the scheme's timing/phasing arrangements. The measures detailed above shall be retained and maintained thereafter throughout the lifetime of the development.

Reason(s)

- To reduce the risk of flooding to future occupants.

Environment Agency
Canal Walk, ROMSEY, Hampshire, SO51 7LP.

Flood proofing - advice to LPA/applicant

We strongly recommend the use of flood proofing and resilience measures. Physical barriers, raised electrical fittings and special construction materials are just some of the ways you can help reduce flood damage.

To find out which measures will be effective for this development, please contact your building control department. In the meantime, if you'd like to find out more about reducing flood damage, visit the flood risk and coastal change pages of the planning practice guidance. The following documents may also be useful:
Department for Communities and Local Government: Preparing for floods
<http://www.planningportal.gov.uk/uploads/odpm/4000000009282.pdf>

Department for Communities and Local Government: Improving the flood performance of new buildings:

<http://www.communities.gov.uk/publications/planningandbuilding/improvingflood>

We do not normally comment on or approve the adequacy of flood emergency response procedures accompanying development proposals, as we do not carry out these roles during a flood. Our involvement with this development during an emergency will be limited to delivering flood warnings to occupants/users covered by our flood warning network.

The planning practice guidance to the National Planning Policy Framework states that, in determining whether a development is safe, the ability of residents and users to safely access and exit a building during a design flood and to evacuate before an extreme flood needs to be considered. One of the key considerations to ensure that any new development is safe is whether adequate flood warnings would be available to people using the development.

In all circumstances where warning and emergency response is fundamental to managing flood risk, we advise local planning authorities to formally consider the emergency planning and rescue implications of new development in making their decisions. As such, we recommend you consult with your emergency planners and the emergency services to determine whether the proposals are safe in accordance with the guiding principles of the Planning Practice Guidance (PPG).

Yours faithfully

Miss Suz Greenwood
