Coast protection have **no objection** to the application.

Other general comments that may be of interest to the Applicant are as follows:

- There can be no guarantee that homes situated next to the sea are 100% safe. Living close to any expanse of water always carries some level of risk; homeowners should be aware of this and should take appropriate precautionary measures if they consider it necessary.
- Although the property is located outside of Flood zone 2 and 3 It should be understood that the mapping provided by the Environment Agency is indicative and subject to change as new information / modelling becomes available.
- The Environment Agency have produced National Coastal Erosion Risk Mapping. This dataset provides detail on the predicted erosion rates for the short, medium and long term, along with the

Shoreline Management Plan for each epoch.

- The Beachy Head to Selsey Bill Shoreline Management Plan (SMP) provides a high level assessment of the risks associated with coastal evolution and presents a policy framework to address these risks. <http://www.se-coastalgroup.org.uk/wp-content/uploads/2013/10/Beachy-Head-to-Selsey-Bill-SMP-FINAL.pdf>
- The River Arun to Pagham Flood and Coastal Erosion Risk Management Strategy sits below the SMP and suggests how best to manage coastal flooding and erosion risk over a 100 year strategy period for smaller lengths of coastline. The Strategy has identified shortlisted options on how this can be achieved, provided funding is available. - The Government's current strategy for funding capital works (e.g. major groyne replacement schemes) is known as Partnership Funding. If or when any Partnership Funding might be required direct beneficiaries of the defence are likely to be approached. I.e. those likely to be at risk from flooding or erosion within the timescale of the scheme. I have provided a link which explains partnership funding in greater detail - <https://www.gov.uk/government/publications/flood-and-coastal-resilience-partnership-funding>
