We wish to object to the above planning application on the grounds of the congestion of traffic. There is already congestion on the roads when school children travel to and from school. Waits of around 15 mins trying to get onto the main road in these times is usual. The schools will have to absorb some 900 children, with cars taking and collecting children, . The thoughts of at least 600 more cars on these roads if planning permission is given, and the fumes while so many more cars are just waiting at traffic lights is not acceptable. I recently had to get to St Richards hospital and the traffic around the hospital was really bad, the roads are too narrow, Numerous parked cars did not help taking up road widths. These roads will get even more difficult if planning is permitted. I sincerely hope that we are not going to have a substantial increase in cars and overcrowding. generally.
