Dear sir/Madam

RE: - Planning application for Additional Driveway Entrance on above property-104 Elmer Road.

We have recently moved to the property which is in a residential area of Elmer and found the local bus route runs passed the front of the house with both single and double decker buses passing the house several times an hour. The road outside the property is very narrow, and if we park a vehicle outside the house the bus has trouble getting past, therefore, we would like to extend our hardstanding in the front of the house to keep our cars off the road, however to do so we would need an additional access creating an in/out drive. This would also stop people parking in this narrow part of the road and assist with the flow of traffic when the buses pass

I have detailed a sketch of the proposed works which would be completed by local approved contractors to carry out the works to drop the kerb outside the proposed new access, and to form the new driveway and hard standing

Should you require any further information or clarification please do not hesitate to contact
Yours Sincerely

Gary Morris
