Essential maintenance is being carried out to the planning, building control and local land charges database during the week commencing 12 April 2021.

During this time there will be no public or staff access to any records held within this database, and it will not be possible to carry out any of the following tasks via the Arun website:

- Research planning and building control history
- View any planning applications, plans, agreements, tree preservation orders or competent persons data
- Submit building control applications
- Submit planning application comments
- Report any planning compliance issues

The publicity and consultation period for all planning applications that fall over this week will be extended by a further week to ensure no one is disadvantaged.

All other aspects of planning, building control and local land charges will be limited during this week and you are strongly advised to contact the individual departments before 12 April 2021 for specific restrictions during this time.

Dear Finlay and Tim,

Whilst we have gone about this in a slightly unorthodox manner and not every detail has been covered off, the soakaway sizing that has been proposed meets our requirements and I do believe that a contractor could competently construct the surface water drainage from the information that has been supplied. As such, I will recommend that Condition 3 on application ref M/48/19/HH is discharged.

Please ensure surface water drainage is constructed in accordance with the following documents:

- West Drive 8 – Drainage
- 4D800 Yard Gully
- Wavin 6LB600 with 4D920
- Construction Detail
- Wavin 6LB300 Installation Detail

Kind Regards

Sarah Burrow
