Tree Survey:

T1: Quercus Robur - Pedunculate Oak.

Height: 14.5m.
Radial spread: 12m.
Age class: Semi-mature.

Remedial works required:

Proposed Works:

Crown reduction to a height of 12.5 metres and a radial spread of 10 metres. Crown lift to a height of 4 metres above ground level.

Reasoning:

The tree has previously undergone crown reduction to maintain clearance from telephone wires in the rear lane; remedial pruning is now required to manage regrowth. Ongoing maintenance is essential to ensure the tree's long-term health and safety while preserving its significant amenity contribution to the local landscape.

Yours sincerely

Chris Matthews

All works are carried out in accordance with BS3998:2010 recommendations for tree work. We maintain public liability insurance up to £5 million. Please note that Conservation Area Planning rules or Tree Preservation Orders (TPOs) may be applicable to some trees, requiring local authority consent. We always verify the absence of restrictions prior to commencing any work. If planning permission is necessary, please allow up to eight weeks for a decision.
