

REASONS FOR PROPOSED TREE WORK

G1 group of Hazel along the rear fence/ditch line

- Fell the larger 5-6 largest diameter stem section heading over the ditch line
- Reduce to previous level
 - Current height 6m approx.
 - Finished height 3m approx.
- Trim the overhang back over the garden – client to advise
 - Current branch length 4m approx.
 - Finished branch length 2m approx.

The pruning is intended to open the ditch line to the north of the group of trees whilst maintaining an acceptable screen to the properties to the rear

G2 group of 2 x Lawson cypress in the front garden

- Sectional fell
- Leave low stumps

The trees are getting big and blocking light and generating mess; there removal will open the area and remove the nuisance they're causing
