Andrew,

Further to my email of earlier today please find attached our drawing 789 PL003 indicating three of the indicative 3D images with the cladding shown as fresh sawn as this is the reality of the material when first fixed. I have also added example images of buildings showing the initial fresh sawn colour and the faded silver grey and some side by side comparison images.

I have also changed the elevations to indicate vertical cladding in light grey rather than the 'orange' of the original application drawings.

Will these be sufficient together with photographs of the existing properties photographed from the rear and photographs of individual modern properties in proximity to the site?

I will wait for your comments to my earlier email before sending the street elevation.

Kind regards,

Michael Wood
