Subject: Re: M/25/19/PL

Hi Andrew

I don't know what to say, this goes on and on, this is ridiculous, 24 weeks since the application was lodged.

Firstly.

In reply to your email this morning, can I ask that this is posted in the web site today.

We currently have an approval on this site that the EA was not consulted on and therefore perhaps sets a precedent for you to approve without their input. Having said that, the revised FRA should be to their approval, as it places the **main** habitable space above the future projected flood level, with flood protection measures to the ground floor. Could you please have look at the revised FRA to see if this could be a way forward.

Secondly, in reply to you comment this morning regarding the link

Following a meeting we had 7th May 2019, its was agreed that I would remove the door connecting the replacement house from No 25, to satisfy your concerns at the time.

These drawings were sent to you by e-mail on the 8 May 2019 at 14.13, they have never been posted on the web site.

You replied on the 8th May 2019 at 14.22, which means you did receive them.

Subject line - RE: M/25/19/PL 27 Central Drive, amended drawings for substitution into application

Ivan,

Should all be good to go once the Environment Agency issues are resolved subject to the final opinion of my line management team.

Thank you,

Andrew Wood MRTPI

Kind regards

Ivon

Morning Andrew

I see we have had a “no objection from Greenspace”

So that just leaves the EA, have we had a reply, by your own e-mails they have now had the revised FRA for more than 4 weeks since the 24/07, although it was submitted on the 15/05?

I have contacted Suz Greenwood, but I am told she is on leave until 10/09, yet further delay by the looks of it.

Kind regards

Ivon
