Hi Anita

I have had a site meeting with their engineer but that is as far as I have got. I know I need to look at it but not sure when I will be able to yet.

Sorry

Paul Cann
Principal Drainage Engineer
Engineering Services

Arun District Council, Civic Centre, Maltravers Rd, Littlehampton, West Sussex, BN17 5LF

Hi Paul,
Can you give me an update on this application please? Have you spoken to the agents?
Thanks
Anita

Subject: RE: Planning Consultation on M/28/20/DOC

Thanks Sarah,
Can you forward the e-mail to Paul and ask him to look at it on his return?
Regards
Anita

Arun is a CIL Charging Authority, for more information go to www.arun.gov.uk/cil

Save the environment - think before you print.

Hi Anita,

Forgive me if I'm wrong, but I believe Paul provided these comments? I'm afraid I can not offer any explanation as to why the engineer could not get through to me, apart from misspelling my name as a possibility? My work mobile has bitten the dust, but the landline redirects to my personal mobile.

In any case, I do not think I am in a position to be able to answer questions on all of these points as I do not believe I provided the consultation. I am happy to give general guidance, however for site meetings and agreement on the details, Paul will have to be contacted. I am sure you are aware he is on leave this week, returning on Monday 22/6/2020.

Kind Regards

Sarah Burrow

Hi Sarah,

Please see comments from the applicant's drainage engineer. They have tried to contact you directly without success. Can you let me have your comments and copy them into any response.

Thanks

Anita

Save the environment - think before you print.

Hi Anita,

The applicant's drainage engineer wrote to Sarah Burrows using the address that Juan gave me, but it bounced back as 'no longer valid'. Is there a different email address, or an alternative contact that they should approach?

With thanks,

Nik

Hi Nik,

Given that discussions with Engineers are ongoing can we agree to an EOT until 08-07-2020 to allow for receipt of additional information , re-consultation and response?

Regards

Anita Gardner

Arun is a CIL Charging Authority, for more information go to www.arun.gov.uk/cil

Visit Arun's web site at www.arun.gov.uk

Save the environment - think before you print.

Hi Anita,

Thank you for sending these comments through. We will review them and come back to you as soon as possible.

Please could you provide contact details for the drainage engineer who provided the comments? It may be helpful for the two specialists to talk some of the points through on the phone.

On timescales, I understand that you will want to determine the application within the determination period. I would anticipate that my client will be open to extending that by agreement, if necessary. Given that the application was validated on 23rd April (I know that you explained that your colleagues in the drainage team had a backlog), I think that would be a fair and reasonable approach, if required.

With thanks,

Nik

Subject: FW: Planning Consultation on M/28/20/DOC

Dear Mr Smith,

Please see the comments of our Drainage Engineers below.

Can you advise of the likely timeframe for receipt of the additional information requested and how you wish to proceed? I would suggest that unless the outstanding information can be provided within the next 2 weeks the application should be withdrawn and re-submitted at a later date. Unfortunately, unless the information is received within 2 weeks the application is likely to be refused.

Regards

Anita Gardner

Engineers comments;

The level of detail supplied is currently insufficient to enable the discharge of conditions 11, 13 or 14.

Firstly, we need to be sure that shallow infiltration is not possible, as part of an overall scheme. Please provide a plan showing all the groundwater monitoring point locations and the monitoring results for all, not just WS02. Achieving 1m freeboard between the base of structures and the peak recorded groundwater level is not a requirement in this particular area, so long as the base is above the peak recorded level. This information will dictate as to whether shallow winter infiltration testing will be required.

Regarding the ditches on the southern boundary, it is very likely that these will need improvements and I suggest a meeting takes place on site to look at these. Land Drainage Consent will be required for any alterations to them, including culverting and any discharge structures. This will all need to be fully detailed on the drawings.

Once we have agreed the scheme principles, fully detailed plans will be required to include pipe/structure, cover levels/invert levels/base levels/diameters/gradients, etc, along with fully detailed construction drawings for all drainage elements. Please note that open suds features should be employed where possible. The current arrangement of crates is currently not desirable, since they have been arranged in manner as to use almost every piece of available space outside the root protection zones (zones will need to be confirmed), rather than achieve a more practical layout whereby membranes can be wrapped around the crates in a more suitable manner ie. reduce the number of corners. Please note that our tree officer will need to be involved in discussions in this respect due to protect the trees and the crates. Permeable paving will need to be employed where ever possible.

The maintenance manual can be commented upon, once the fundamentals have been agreed.

The applicant should also provide topographical evidence to show that no overland/exceedance run off flows from the field to the north will have any detrimental effect on the development/suds.
