Attachments: Drwg 26A Garage Plan and Elevations as Proposed.pdf

Good afternoon Zac,

As discussed this morning, I have attached an amended design for the garage with a 15 degree slate roof. This gives ridge height of approximately 3.0M.

Best wishes,

Michael.

Dear Mr Bish,

Thank you for your email.

When the application is considered, a view will be taken as to the relevance of the conditions suggested by the consultees, if it is felt that the imposition of the condition is unreasonable, then it will not be applied.

Kind regards,

Zac

Dear Mr. Denton

I have tried to contact you several times and have left various voice messages. I have also tried to contact Laura Gibbons. I am concerned that the comments raised by Laura Gibbons regarding surface water drainage are rather generic and not really appropriate for this application.

The proposals of the application are mainly in the roof with no changes required to the surface water drainage. The existing surface water drains will be used so no new soak-aways are required. There is no additional increase in footprint of hard areas, so the surface water drainage is not being effected at all.

In essence this planning application is just to cover the front dormer windows and the replacement garage located to the front of the property. The proposals to the rear of the property are actually covered under Permitted Development Rights. I just included them for completeness.

Would it be easier if I requested that for this application, only the front dormer windows and the replacement garage located to the front of the property are to be considered?

Best wishes,

Michael.
