Subject: M42/19/PL

Regarding the above planning application please find attached photographs showing slow worms and context of the photos to show they are in my garden at 119 Elmer Road.

Also I wanted to air my concerns over the use of the private driveway that's adjacent to 117 Elmer Road and how much heavy use this may get if there is a new development. It is not suitable for heavy vehicles therefore any damage would need to be made good.

I have tried to get in contact with the planning department but no one has returned my calls. I wanted some advice over the conifer hedging that exists between 117 & 119 Elmer Road.

Kind regards
Penny Buckland
