93 Middleton Road - Planning Application for New Site Access

This Message originated outside your organization.

Attention Sian Eggington

Ref your letter dated 9th July 2020 requesting additional information on M/47/20/HH

Please will you provide additional clarification on the two items listed in your letter.

With regard to the plans not being to scale. Regrettably, due to the current Covid situation, I am unable to submit paper plans. I have submitted this application in the same format used and agreed for my recently approved NMA on the same site. Please can you advise what I need to do to make the submitted plans acceptable for this application using the same format as previously agreed. I am a self-builder with limited access to technology.

I read the requirements for the CIL and as my application did not add any buildings or additional area, believed that it was not applicable. It did not appear as a requirement on the information status section of the online form. Tried this evening, but I could not find a non-PDF version on the website that I could use to download and complete the document. Please can you provide the document in a format that I can complete and submit.

Regards, Jeff
