Subject: Planning application M/80/19/PL

We would like to strongly object to the above planning application.

This large development will without doubt increase the volume of traffic in the area which will mean the possibility of more accidents and a higher risk of personal injury accidents to all road users and pedestrians, especially children. We also don't believe this is a suitable place for people with dementia, living so near to the really busy and often dangerous A259 at Comet Corner. There is also going to be added pressure put onto the sewage and drainage system, which struggles to cope now, and the area near to this proposed development already floods. This will only get worse due to there being much less soft ground for water to drain away once a building of this size is completed. Our other serious concern is the added work load placed onto our already over stretched doctor's surgery. They do a very good job but even now you often wait for an appointment and a 66 room care home will certainly make this situation worse, meaning longer waits for patients, with the possible serious outcome this could have.

We trust you give our concerns, and those of other residents serious and logical consideration, and not to approve this application. Thank you. R.J. and Mrs. P. J Bourne.
