Subject: OBJECTION TO PLANNING APPLICATION M/80/19/PL

Grounds for objection:

FLOODING AND SEWAGE

This and surrounding areas are already liable to flooding, mainly from surface water and inadequate drainage. This proposal will add further strain to drainage and risk flooding to local properties.

HIGHWAY SAFETY

Comet Corner is already very dangerous with numerous accidents and near misses. No doubt a fatality will one day occur due to the poor junction arrangements. Any significant development in this local area will increase the risks at this junction and on the local roads by increasing fast moving traffic (Ambulances), service vehicles, resident, staff and visitor vehicles on a 24/7 basis.

OVERDEVELOPMENT

This vast structure will dwarf local houses and is totally out of character in the location proposed

Best regards

Mr Peter Rowe
