INTRODUCTION

The proposals comprise the construction of a replacement single storey rear extension. The existing extension would be removed, and the replacement extension constructed from the line of the original rear wall.

REASONS FOR COMPLIANCE

We believe this work can be carried out within householder permitted development rights based on the following criteria:

Class A -

- (a) The permission to use the dwellinghouse as a dwellinghouse has not been granted by virtue of Class M, N, P, PA or Q of Part 2 of the schedule. The property has always been a dwellinghouse.
- (b) The proposed work would not result in the total area of ground covered by buildings within the curtilage of the dwellinghouse exceeding 50% of the total area of the curtilage;
- (c) The height of the proposed extension would not exceed the highest part of the roof of the existing dwellinghouse;
- (d) The height of the eaves of the proposed extension would not exceed the height of the eaves of the existing dwellinghouse;
- (e) The proposed extension would not extend beyond a wall which
 - (i) forms the principal elevation of the original dwellinghouse; or
 - (ii) fronts a highway and forms a side elevation of the original dwellinghouse;
- (f) The proposed extension would not comprise a single storey extension which
 - (i) extends beyond the rear wall of the original dwellinghouse by more than 4 metres;
 - (ii) exceed 4 metres in height.
- (g) The dwellinghouse is not on article 2(3) land or a site of special scientific interest.
- (h) The enlarged part of the dwellinghouse would be single storey only.
- (i) The proposed extension would not be within 2 metres of the curtilage and with an eaves height of more than 3m. The extension would have a flat roof, and the top of this flat roof would be no more than 3m above ground level;
- (j) The proposed extension would not extend beyond a side elevation of the original dwellinghouse.

(k) The proposed work would not include –

- (i) The construction or provision of a verandah, balcony or raised platform. The rear extension would include two areas of overhanging roofs, but these would each be classed as – and will function as - porches for external rear doors. The external floor area of each of these porch areas would be less than 3 square metres,
- (ii) The installation, alteration or replacement of a microwave antenna;
- (iii) The installation, alteration or replacement of a chimney, flue or soil and vent pipe, or
- (iv) An alteration to any part of the roof of the dwellinghouse.

Class A2 – The dwellinghouse is not located on article 2(3) land.

Class A3 –

- (a) All materials used in the exterior work of the proposed extension shall be of a similar appearance to those used in the exterior of the existing dwellinghouse.
- (b) There shall not be any new windows in upper floors.
- (c) The enlarged part of the dwellinghouse shall be single storey only.

Class B – This relates to the enlargement of a house consisting of an addition or alteration to its roof, and is not relevant to the proposals for a single storey rear extension.

Class C – This is not relevant as it relates to any other alterations to the roof.

Class D – This relates to the construction of a porch. It will be seen under class A k (i) above that two porches – each under 3 square metres – are proposed outside the external doors of the proposed rear extension but they would be included in the Class A (i) permitted development extension limit of 4 metres beyond the original rear wall of the dwelling.

Class E – This is not relevant as it relates to buildings or enclosures within the curtilage of a dwellinghouse.

Class F - This class is not relevant as it relates to hard surfacing within the curtilage of a house.

Class G – This class is not relevant as it relates to the installation, alteration or replacement of a chimney, flue or soil and vent pipe on a dwellinghouse. None of these items are being proposed.

Class H – This class is not relevant as it relates to the installation, alteration or replacement of a microwave antenna.

SUMMARY

We believe the proposed replacement single storey rear extension can be carried out within householder's permitted development rights for the reasons outlined above.
