**Date:** 20 December 2021

Dear Sir/Madam

**REVISED DOCUMENTS - DEMOLITION OF EXISTING BUNGALOW &  
CONSTRUCTION OF 1 NO 2-STOREY DWELLING WITH ACCESS & OFF ROAD  
PARKING 68 ANCTON WAY ELMER MIDDLETON-ON-SEA PO22 6JP**

Thank you for consulting the Environment Agency on the above application.

We have reviewed the information as submitted and set out our position below.

**Environment Agency Position**

We would like to note, that whilst we have not objected to this application, the correct climate change allowance assessment has still not been undertaken (2125). Any future applications should ensure they comply with our climate change guidance at <https://www.gov.uk/guidance/flood-risk-assessments-climate-change-allowances>.

**Advice to LPA/Applicant**

**Flood resistance and resilience**

We strongly recommend the use of flood resistance and resilience measures. Physical barriers, raised electrical fittings and special construction materials are just some of the ways you can help reduce flood damage.

To find out which measures will be effective for this development, please contact your building control department. In the meantime, if you'd like to find out more about reducing flood damage, visit the Flood Risk and Coastal Change pages of the planning practice guidance. The following documents may also be useful:

## **Flood warning and emergency response**

We do not normally comment on or approve the adequacy of flood emergency response procedures accompanying development proposals, as we do not carry out these roles during a flood. Our involvement with this development during an emergency will be limited to delivering flood warnings to occupants/users covered by our flood warning network.

The planning practice guidance (PPG) to the National Planning Policy Framework states that, in determining whether a development is safe, the ability of residents and users to safely access and exit a building during a design flood and to evacuate before an extreme flood needs to be considered. One of the key considerations to ensure that any new development is safe is whether adequate flood warnings would be available to people using the development.

In all circumstances where warning and emergency response is fundamental to managing flood risk, we advise local planning authorities to formally consider the emergency planning and rescue implications of new development in making their decisions. As such, we recommend you consult with your emergency planners and the emergency services to determine whether the proposals are safe in accordance with the guiding principles of the PPG.

The applicant/occupants should phone Floodline on 0345 988 1188 to register for a flood warning, or visit <https://www.gov.uk/sign-up-for-flood-warnings>. It's a free service that provides warnings of flooding from rivers, the sea and groundwater, direct by telephone, email or text message. Anyone can sign up.

Flood warnings can give people valuable time to prepare for flooding – time that allows them to move themselves, their families and precious items to safety. Flood warnings can also save lives and enable the emergency services to prepare and help communities.

For practical advice on preparing for a flood, visit <https://www.gov.uk/prepare-for-flooding>.

To get help during a flood, visit <https://www.gov.uk/help-during-flood>.

For advice on what do after a flood, visit <https://www.gov.uk/after-flood>.

Please do not hesitate to contact me using the contact details shown below should you have any queries regarding the above information.

Yours faithfully

**Mrs Sophie Brown**  
**Sustainable Places Planning Advisor**
