Dear Cllr Mrs Oakley,

I have been out this morning and posted a second notice on the shop window.

The address of the application has not been amended. The address is not incorrect since it clearly includes the property number and is as submitted by the applicant's agent. Indeed it may be that people will more clearly identify the premises since it refers to the previously established occupier.

Yours sincerely

Anita Gardner

Further to our conversation yesterday I believe that this application could have serious effects on the immediate neighbourhood and that the Parish Council is likely to object to it. If they do so then I should be grateful if the application can be referred to the Briefing Panel.

I have now checked the siting of the planning notice which you have placed on a metal pole at the foot of the bank, on the roadside. Unfortunately the pole is not in front of the premises and in any case is obscured throughout the day by cars parked immediately in front of it. There is no footpath and the notice is only visible from the footpath on the northern side of Middleton Road. Anyone wishing to view the notice would have to cross this busy road and stand in the roadway to read it. Should it not be placed on the premises which has a number of windows fronting on to the footpath in front of the premises?

I also note that the application gives the address as The Middleton Pharmacy. The Pharmacy ceased trading some considerable time ago and became a cafe, now known as the Warm Bee. Should the application not refer to its present use?

Barbara Oakley
