ADDITIONAL NOTES:

Description of the proposal

I wish to place a small storage container(dimensions, 17ft x 7.6 x 7.6) on my land/small holding to store associated gardening equipment, my motorbike, (which due to ill health I can not ride at the moment) also my chicken feed & bedding along with my horse feed and hay. I have planted conifers along the fence line where I would like to position the container I have also painted it green so that it will blend in the natural environment.
The small container is not in a direct line of vision from the surrounding properties and would be placed adjacent to the already existing large cow barn to the north of my property, the same farm whom I presently rent a horse grazing plot from. There are no objections from the tenant farmer.

I apologize for any confusion that I may have caused with my previous planning application for the caravan as this was completely unintentional. The only reason I am wishing to get planning for the container is both for visual enhancement of the surrounding area and to protect my belongings securely, thus not attracting opportunistic crimes as the small container could be easily locked up. The items I wish to store in this container are essential food and agricultural items as well as previously mentioned my motorbike, which are currently stored under tarpaulins, as well as being unsightly are also proving a haven for rats, I do use pest control but worry my livestock may become at risk if any gets into their feed. Thank you for your time and attention to this matter.
