Subject: Seasonal Workers - Pagham - Lagness Site

Seasonal Workers Village/Hub at the Lagness Site will add to the road chaos as well as the unmitigated misery of the residents it sits in between. The Nursery should be responsible to invest in somewhere more practical and not on a busy, poorly maintained, busy unlit road on dangerous bends. We do not need more traffic jams along this road from added vehicles and bicycles.

- Added traffic (including bicycles) to dangerous B2166 and on lethal bends
- No space for earth/sound/light banking to block from residents and road users
- No security & has direct access to private homes

chaos as well as the unmitigated misery of the residents it sits in between.

- Original constraints put in 2005 planning permission which are not being adhered to regarding Staff numbers, Vehicle Numbers, Working hours & Lighting
- Proximity to residents (situated directly in the middle of 6 homes)

I request Arun to issue an Article 4 directive to remove the Permitted Development Rights for this nursery.
