

Importance: High

Pls add to the case file as an Objection

Thanks

Amy

Dear Amy/Liz

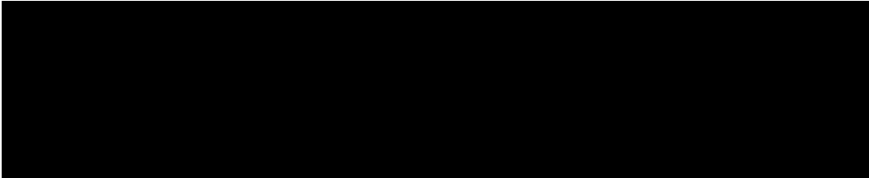

I refer to the e mails below copied below and confirm that the site is not included within the proposed LGS Allocation in the REG 14 Consultation Plan published for public consultation on 29 June 2020 but also confirm that the REG 14 Consultation Plan is a material consideration in the determination of planning applications and that the proposal is in direct conflict with REG 14 PNP Policies 1,2 and 9 and the ALP 2018 Policies as specified in the PPC response dated May 2020 and my e mail to you dated 30/6/2020. I also note the ADC Tree Officers report dated 1/7/2020 now on file makes it clear that the proposals fail to demonstrate compliance with ALP 2018 Policy ENV DM 4 Protection of Trees also.

Information on the file suggests that this is being considered by officers under delegated powers today hence the urgency of this reply.

Please place this e mail exchange on the file.

Thanks

Paul Collins BA (Hons) DipTP

Please could you let me have a response for this enquiry?

Thanks

Best wishes

Nicola

[REDACTED]

Dear Sir/madam

In a recent planning consultation reply concerning application P/116/19/OUT the PC has stated that the site is allocated as a proposed local green space, in the emerging Neighbourhood Plan. Having looked at your regulation 14 Version of the proposed Neighbourhood Plan the site falls outside the proposed local green space (I attach a copy which identifies the application site). Can you please confirm that the site falls outside the proposed local green space and that the comment made by the PC is incorrect.

I will appreciate your confirmation of this asap and thank you for your time in this matter.

Kind regards

Liz Lawrence
