Simon,

Many thanks for forwarding the WSCC M&W comments .

I can confirm that the proposed works will in no way impact or impede the operation of the adjoining AD plant either during construction or once operational. I should also stress that the existing AD plant is owned and operated by the applicant of the current application. The AD Plant plays a vital role in the overall business as a means of both waste disposal and power generation and therefore there is a critical and compelling commercial driver to ensure its ongoing operation is not impacted by the proposed development.

I trust this provides the necessary assurances and that you do not require me to express them in a more formal way?

Regards

Dear Richard,

Please see attached comments of WSCC Waste and Minerals. Please can you provide a statement to respond to the issue raised. Please respond in 10 days so I can then reconsult with County.

Kind Regards.
