

REASONS FOR PROPOSED TREE WORK

T1 Sycamore adjacent to drive:

- Lateral prune to source the group of 5-6 lowest branches to facilitate a crown lift of 6m above ground level
- Crown thin by 20% with a maximum wound diameter of 50mm
- Remove deadwood over 10mm in diameter
- Remove rubbing and diseased branches

The proposed works is intended to allow more light into the area below the tree and the property.

The group of 5-6 lowest branches intended for removal will not exceed 75mm in diameter and will NOT include the main scaffold limbs and will be confined to the subordinate limbs emanating from the main scaffold limbs.
